Navigate new EU security regulations with STM32 wireless solutions

Additional resources

Hi Igor

It was a pleasure having you at our recent webinar! During this session we explored the RED delegated act (DA) and harmonized standard EN-18031 for STM32 product certification requirements.

For further insights, you can explore our follow-up resources:

► Webinar presentation - A thorough overview of the session's main highlights.

► Deep dives on RED & CRA - Technical guides for mandatory STM32 certification under EU's Radio Equipment Directive and Cyber Resilience Act.

► FAQ on RED & CRA - Essential answers on product impact, timelines, and ST support for compliance.

► STM32Trust security policies - ST's secure development rules, including software classifications and vulnerability management.

► Q&A for STM32 software security - Clear explanations of ST's security development lifecycle and software classifications.

► Product Security Response Team (PSIRT) - ST's official process for reporting and managing software vulnerabilities.

► Contact ST Online Support Center - to obtain the EN-18031 templates for STM32 wireless devices.

You can watch the complete webinar recording on-demand using the link below.
